

## CERTIFICATION

**RE: Tenino Copper Naphthenate wood preservative complies with AWWA M 4-15 and P 36-16 specifications.**

Tenino Copper Naphthenate wood preservative contains 2% copper as metal (17% by volume) and conforms with the AWWA's (American Wood Protection Association) standard **M 4-15** for ground contact field treatments of previously pressure treated wood. Tenino is produced with Copper Naphthenate Concentrate that contains 8% copper as metal (68% by volume). This Copper Naphthenate formula meets all the requirements of AWWA standard **P 36-16**.

Tenino Copper Naphthenate may also be used to meet Federal Spec TT-W-572B.

Please feel free to contact me should you have additional questions.
