

NANO WAND

What is Nano Wand?

The Nano Wand is a natural energy generating device. The energy created specifically rejuvenates molecular structures in all liquids. The molecular structure causes any liquid to become more hydracious, taste better and extend shelf life. Placed in a fridge, the Nano Wand's energy frequency permeates the fridge; all liquids, meat and fruit will taste better and have extended shelf life. The renewed molecular chains are similar to those found in healthy natural spring water.

Like fruit and vegetables, the body slowly also loses molecular chains as we age. They can be re-energized at a molecular level to provide energy, using the Nano Wand. The hydracious nature of water is important to wellness. Molecular structured water carries improved oxygen flow to the blood, assists in detoxification of free radicals, improves liver detoxification, and improves nutrient take up by the body. The natural energy of the wand improves sleep patterns when placed under the bed and improves the positive chi energy of the body when worn or carried in a bag.

What is Nano Wand made of?

Technically engineered natural minerals are fused and structurally bonded together at a molecular level, using several high heat fusion methods. The combination of the minerals and the fusion techniques produces a catalytic conversion of energy, developing a long lasting natural resonance which has the ability to be transferred to any liquid, renewing the natural molecular chains.

How does Nano Wand work?

The 'beta' rhythm frequency spins at an anti clockwise direction, and like other 'energy waves', it can 'influence' inert objects. For instance, a magnetic field can influence metal objects and an x-ray can influence film strip. Likewise, beta rhythms at the correct frequency and spin velocity will liquify.

What kind of minerals are in the Nano Wand? How many of them?

The body of the Nano Wand houses 11 minerals locked into it by high heat fusion techniques and is technically engineered. Each mineral grain has its own individual shape and size that when combined with the other minerals, through a catalytic conversion, generates the spinning resonance we call chi energy.

How does the energy transfer to the water using the Nano Wand?

The Nano Wand energy spins into the liquid, counter clockwise, or the liquid can be poured over the Nano Wand where it 'picks up' the resonance. The resonance generated is similar to that which is found in the earth surrounding many healing spring waters of the world. At the moment, scientists can't understand why liquids behave differently and positively in the energy field. Much research is now focused on this fact as 70% of our

bodies are made from water and it's important to nourish the body with the correct molecular structured water.

Is there any expiry date? What would be the effect after the expiry date?

We expect the Nano Wand's energy to last 30 years as recent tests on the original pre-production test units made five years ago show that they have increased in energy levels. Unlike a magnet, the resonance is not affected by the earth's gravitational pull.

When the Nano Wand fails, it will not have the ability to change the taste of any fruit or liquid.

What are the benefits of Nano Wand?

Molecular structures in liquids allow the taste buds to recognize only the taste we enjoy. For instance, any wine, alcohol, coffee, tea or fruit juice will enhance the flavor when a Nano Wand treats the liquid. Any food we consume with Nanonized water will always taste better. Mixing Nanonized water with a beverage reduces the effects of acidity and tannins in the body. When food or medicine is combined with Nanonized water, the nutritional benefits are amplified by enhanced cellular absorption.

The body can absorb liquefied oxygen very quickly, enhancing internal organ functions and adding to blood energy levels. This benefit is important for athletes and workers who need to maintain a high immune system under physical stress. When drinking Nanonized water, the blood's oxygen levels increase. This can be measured using a Medec, Prognos or simple blood sampler. The wellness of Nanonized water drinkers will be that they have increased energy levels and raised immune systems.

The body can take up other essential minerals from Nanonized water. The body's molecular structure can rapidly absorb the nutrients found in the Nanonized water's molecular structure, as the body's molecular structure via D.N.A. 'links' with the water mineral molecules. This effect feeds the body cells with essential minerals. As the water's molecular structure does not break down, it can also absorb cellular waste, such as cholesterol and excess calcium, improve bowel movements and the dissolving of kidney stone, reduce cholesterol levels and a general detoxification of the body can verify this. Individual minerals such as calcium can be taken up by the body cells as required.

Quicker and stronger nail and hair growth improved and an enhanced resistance to tooth decay can visually evidence this. When Nanonized water is used in conjunction with supplements, they are absorbed more quickly and efficiently by the body cells, an important aim for dietary.
