## SVS100SCSX Black Square Camera Reversible Image & Shield

76mm

84mm

70mm

Open - Normal  
Close - Mirror

### Product Information

The SVS100SCSX is a manual reversible image camera - simply move the screw to reverse the camera image as needed. This camera also has an adjustable shield to allow for a suitable cover from the sun at those difficult times of day - early morning and late afternoon. This is a camera to suit most applications with a high number of IR LED's to give great Night Vision where there is no light to assist with 15m range. The SVS100SCSX is a great universal camera built to handle the harsh treatment of our Australian environment.
